

A WORLD OF HEALTH

SCULPT & SLIM

An Amazing Weight Loss Cream

START LOSING INCHES AND REDUCE FAT.....

Everyone has fat cells. Unfortunately, some fat cells naturally retain a higher percentage of fat than others. This fact makes it extremely difficult, if not impossible, to eliminate unwanted fat in certain areas of the body. Since our body is programmed to store this fat, dieting and exercise usually fail to release it. Thus, science must step in and do what nature won't do on its own... LIBERATE STORED FAT!

SCULPT & SLIM™ Cream utilizes a patented liposome delivery system which transports the "all natural active ingredients" directly through the skin and into the fat cells. The active ingredients increase metabolism (burning of fat) in the fat cells reducing the size of individual fat cells and the thickness of the fat layer.

SCULPT & SLIM™ also increases moisture in the deepest layers of the skin (hydrating the skin for increased softness and smoothness and improved texture).

Clinical studies demonstrate that utilizing a 3% **SCULPT & SLIM™ cream** twice daily for 56 days can yield measurable improvements and diminish the appearance of cellulite. Skin firmness was increased an average of 27.8%! (Ballistometry) The visible appearance of cellulite, also known as 'orange peel skin', was reduced as much as 80% and 33% on average! (Profilometry by Image Analysis). Utilizing Co-Enzyme A and a Chinese plant extract, **SCULPT & SLIM™** helps to transform the fat via the G-Protein and convert it to energy.

Directions for Use **SCULPT & SLIM™** can be applied to any part of the body that is clean, dry, and free of oily residue. Apply **SCULPT & SLIM™** generously and massage into the affected area. Apply 2 to 3 times daily.
