

NOW INTRODUCING

Corti-Thin™

Maximum Strength

- REDUCE CORTISOL
 - INCREASE ENERGY
 - LOSE WEIGHT
 - REDUCE FAT
-

Corti-Thin™ our all-natural weight loss formula approaches daily stress and the overproduction of cortisol in the body and weight gain.

According to government researchers, the link between stress, tension, and excess belly fat is clear. High levels of cortisol - a nasty little stress hormone - cause pound after pound of excess body fat to accumulate around your waist and tummy... a health-threatening, figure-destroying condition affecting an estimated 47 million Americans... mostly women.

So if everyday life makes you stressed out and anxious... if you've been accumulating belly fat that just won't go away... if you're overeating in response to daily stress, and you're sick and tired of diet failure, it's time to try ***Corti-Thin™*** the most significant advancement in weight control in more than a decade. Our product ***Corti-Thin™*** is intelligently designed to literally destroy fat.

Ingredients

◆ **Chromium** [Amino Acid – Chelate] (100 mcg)

An essential trace mineral helps the body maintain normal blood sugar levels. Research has shown that it also increases fat loss and lean muscle tissue. It stimulates insulin to encourage the body's cells to release energy and the Amino Acid Chelate, thereby reduces those intense carbohydrate cravings.

◆ **Caffeine** (200 mg)

Which is present in many popular beverages, appears to have an effect on fat utilization. It has been shown that when caffeine supplement is used in capsule form endurance performance is enhanced.

◆ **Proprietary Blend** (580 mg)

Hoodia Gordonii Cactus Powder - a unique natural appetite suppressant that has the singular ability to melt away body fat, end hunger cravings and gives a feeling of fullness, the result is you eat less, and you drop the excess weight faster.

Magnolia Bark Extract (1.5%) Thermogenic properties

Glucosaminan – A thermogenic maximizer, Glucosamine lets you store more food as energy, instead of storing it as fat. Glucosamine is not usually found in weight loss products and the value of this clinically proven ingredient is now recognized.

Green Tea Extract (50%) - green tea extract to help enhance your body's metabolic process.

Theobromine (99%) - Theobromine affects humans similarly to caffeine, but on a much smaller scale. Theobromine is mildly diuretic (increases urine production), is a mild stimulant.

Guarana Extract (33%) – provides 17mg naturally occurring caffeine.

Bitter Orange Peel Extract (10%) – Bitter orange (*Citrus aurantium*) contains several substances known to stimulate metabolic rate, which should increase calorie burning. Although historically used to stimulate appetite, bitter orange is frequently found in modern weight-loss formulas because synephrine is similar to the compound ephedrine, which is known to promote weight loss.

Yohimbe Extract (8%) this extract provides 1.2 mg naturally-occurring Yohimbine.

L-Theanine – unique, neurologically-active amino acid in tea called L-Theanine (gamma-ethylamino-L-glutamic acid). The calming effect of green tea may seem contradictory to the stimulatory property of tea's caffeine content but it can be explained by the action of L-Theanine. This amino acid actually acts antagonistically against the stimulatory effects of caffeine on the nervous system. It also reduces anxiety and increases Alpha-waves and alertness.

Banaba Leaf Extract (1%) Banaba leaf extract contains a triterpenoid compound known as corosolic acid – which has actions in stimulating glucose transport into cells. As such, Banaba plays a role in regulating levels of blood sugar and insulin in the blood. For some people, fluctuations in blood sugar and insulin are related to appetite, hunger and various food cravings – particularly craving for carbohydrates such as bread and sweets. By keeping blood sugar and insulin levels in check, Banaba may be an effective supplement for promoting weight loss in certain individuals.

Guggulesterone – Shown to be effective in lowering “bad” cholesterol and helping to raise “good” cholesterol

Suggested Use

Each bottle contains 60 capsules, which is a one month supply if you take the recommended dosage of 2 capsules per day, 1 with breakfast and 1 with lunch.

NEWSFLASH!

Recently, a well known celebrity from the "Anna Nicole Smith" show lost over 65 pounds when taking a product that contained Hoodia cactus as the main ingredient.

This product contains caffeine and herbal stimulants and is not intended for pregnant or nursing women or children under 18 years of age. Individuals with high blood pressure, heart disease, diabetes, or sensitivity to caffeine should consult your physician before use. In the event of overdose, contact a poison control center at once.
